● **Product Introduction**

The intelligent headband product is based on the Internet of Things and intelligent hardware. Through the functions of automatic data collection and transmission of the hardware device, it can automatically collect, store, upload on-site data and provide voice prompts. It also has the function of night lighting. When paired with the company's system management software ("Background System Management Software" includes a web client and an Android monitoring terminal), it can achieve real-time audio and video calls, real-time video monitoring, real-time voice intercom, real-time GPS positioning of personnel, electronic fences, SOS alarms, fall alarms, AI voice, silent alarms, high-temperature alarms, etc. It provides a basis for on-site intelligent management and helps with safe production.

● **Product Model**

EQ-D6(HB)

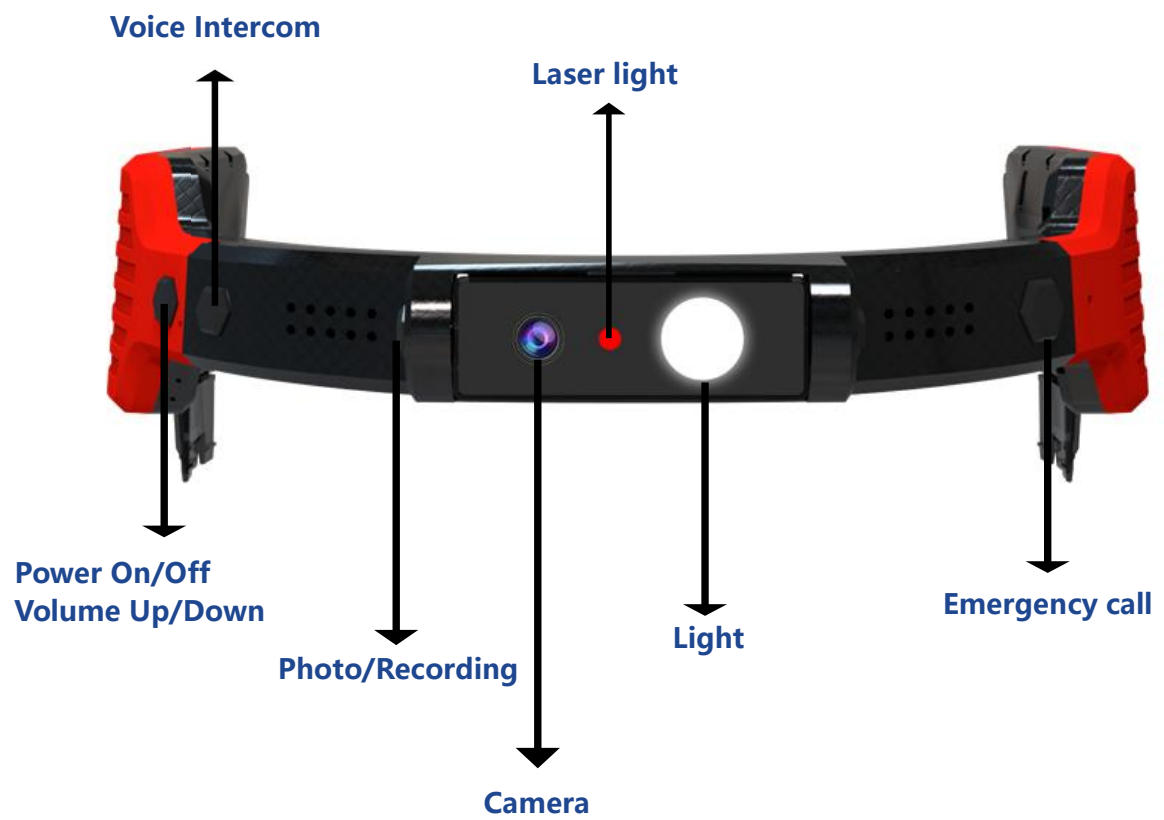

● **Product Features**

- Camera: 21 million pixels, 90° camera
- Video Encoding: H.264
- Battery: 5000mAh non-removable polymer lithium battery
- Protection Level: IP66

- Positioning: Supports GPS and Beidou positioning (RTK high-precision positioning (in cooperation with the RTK base station))
- Communication Frequency Bands: Supports 2G, 3G, and 4G full network communication
- WIFI: Supported (IEEE802.11b/g/n)
- Bluetooth: Supports Bluetooth 5.0
